Douglas González Ortiz

WEB DEVELOPER

I am passionate about technology and software development, with skills to analyze and build software solutions for business needs. I am proactive, hardworking and autodidact, and I keep myself updated on the latest industry trends and tools. I have skills to work in a team, learn from my mistakes and continuously improve my skills.

EXPERIENCE

Analyst and Web Developer at MAPFRE Seguros Costa Rica

October 2022 - Present [Costa Rica, San José, San Pedro de Montes de Oca]

RESPONSIBILITIES

- I worked as a team with other developers, and we collaborated with other departments to ensure that the systems met user and business requirements.
- I performed testing, debugging and code analysis to ensure and improve the quality and functionality of the systems.
- I participated in meetings with the project management team to establish objectives and define system requirements.

ACHIEVEMENTS

- Working as a team, we performed a complete migration of the web application design (API), improving the reading of data for the user by rewriting code in HTML,CSS and Bootstrap.
- I improved and upgraded the company's existing systems using C# Model-View-Controller (MVC) architecture model, implementing new features to increase efficiency and functionality.
- I designed and developed a complete new product for MAPFRE's clients using HTML, CSS and JavaScript, and integrated it with existing functionalities to create a more complete and user-friendly product.
- As a team we took the initiative to implement new technologies Angular (SPA) and ASP.NET in a two assigned project, this to improve the user experience and increase the operational efficiency of the company.

SKILLS

Fast learner	Creativity	C#
Problem solving	Effective communication	SQL
Team player	HTML	Git
Adaptability	CSS	Angular
Project management	JavaScript	

PERSONAL PROJECTS

Personal Portfolio

I developed a personal portfolio using technologies such as Angular and Git to showcase my personal skills and achievements.
The portfolio is presented through a remote web page and shows all the evidence of work, work experience, academic background and technical skills.

EDUCATION

Software Development at Maximo Quesada Technical High School

2019-2022 [Baccalaureate and intermediate technician]

Baccalaureate Software Engineering at CENFOTEC

May 2023 - In progress [Costa Rica, Av Central, Francisco Peralta, San José]
